

# Worth the Bucks?

Does your teen dream of owning a car? Give them a reality check on what it really costs to buy, insure, and maintain a vehicle.

## Drive the Conversation

Have a car chat with your teen using these prompts:

**What are the alternatives?** Add up the costs of driving, taking the bus, or riding a bike to school. Which form of transportation is the most economical?

---

---

**Is buying your own car a realistic goal?** Research the cost of buying a new or used car online, and figure out how long it would take to reach that savings goal.

---

---

**What can you contribute?** Together, come up with an amount your teen could contribute each month to the cost of your family car expenses.

---

---
